

Keeping Middle Grades Students On Track to Graduation

Initial Analysis and Implications

Robert Balfanz, Johns Hopkins University

Liza Herzog, Philadelphia Education Fund

May 2006

Supported by the William Penn Foundation

Research Question

How early in the middle grades (g. 6-8) can we identify students at high risk for falling off the graduation track?

Important Prior Findings

- Students who enter high school *two or more years behind grade level* in math and literacy have only a 50/50 chance of on-time promotion to the 10th g.
- Ninth grade retention is a major risk factor for dropping out of high school

Cont.-Prior Findings

- Student **attendance, behavior, and effort** all influence the likelihood that students will significantly improve their achievement levels during grades 6-8
- In a representative sample of high poverty middle schools in Phila., 77% of the students who had 95%+ attendance, got excellent behavior marks, had above average effort levels in 6th—8th g., *made large achievement gains in math*

Impact of Attendance

Figure 3 (*Impact of Attendance*)

Percentage of total school days attended

(CEMS student; Non-Asian Student; from Cohort 1; with effort of 6; behavior of 2; percentage of effective math teachers of 50)

Impact of Behavior

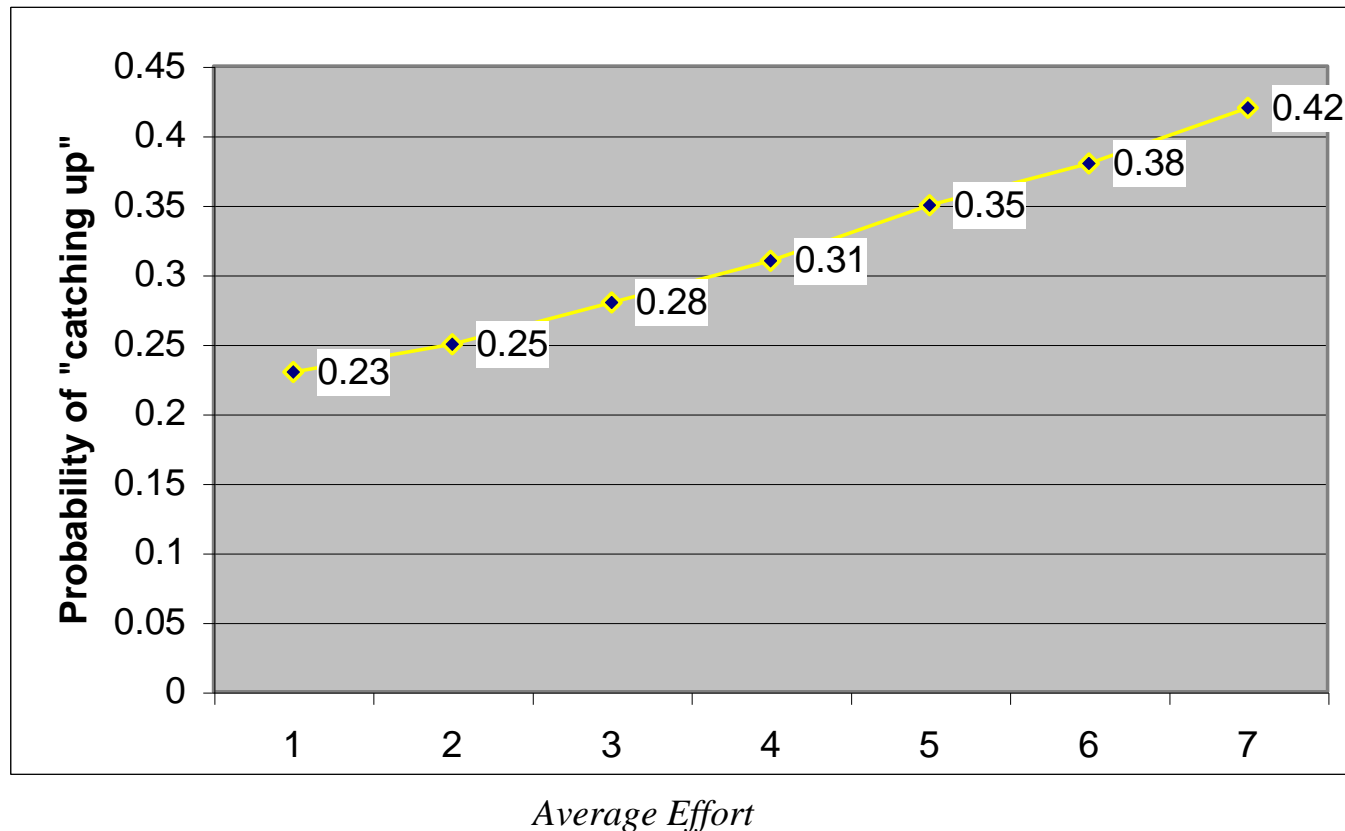

Figure 5 (*Impact of Behavior*)

*Average Behavior Marks (1 = Excellent, 2 = Satisfactory, 3 = Unsatisfactory)
(CEMS student; Non-Asian Student; from Cohort 1; with attendance rate of 92%; effort of 6; % of effective math teachers of 50)*

Impact of Effort

Figure 4 (*Impact of Effort*)

(CEMS student; Non-Asian Student; from Cohort 1; with attendance rate of 92%; behavior of 2, percentage of effective math teachers of 50)

Why Focus On Middle Grades?

- **Adolescence** and living in neighborhoods with concentrated **poverty** have been shown to negatively impact student attendance, behavior, and effort

Impact of Adolescence and Poverty on Attendance in Baltimore

High Poverty Neighborhood	% of Students who miss 20+ days (grades 1-5)	% of Students who miss 20+ days (grades 6-8)	# Middle Grade Students (Baltimore)
Clifton-Berea	15%	46%	513
Greenmount	15%	50%	499
Madison	21%	65%	552
Midway	6%	55%	553
Park Heights	17%	57%	627

Middle Grades Dropout Prevention Study—Data and Methods

- We followed all students enrolled in the 6th grade in 1996-1997 through 2003-2004 (*one year beyond standard time to graduate*)
- We also looked at more recent cohorts of 6th graders (*1998-99, 2000-01, 2003-04*) to verify our findings
- We did a preliminary screen of about 20 variables (*i.e., test scores, overage, course failures, attendance, behavior marks*) to see which, if any, could identify as early as 6th grade students at high risk for falling off the graduation track

Data and Methods (cont.)

- We looked for variables with a high yield (75%+ students with this characteristic do not make it to the 12th grade on time)
- Once we identified these variables, we looked at their impact on graduation status (on-time and within one extra year)

Data and Methods (cont.)

Examples of Variables Screened

- Student status: Special ed, ESL
- Standardized test scores: PSSA by scoring level and TerraNova by decile
- Course Failure: core courses
- 5th grade (Big Four)
- Overage: 1-2 years, 2 years+
- 9th g. repeaters
- # Suspensions
- Race and Gender
- SES

Findings-- 4 Powerful 6th Grade Predictors of 'Falling Off Track'

- Attending school 80% or less of the time
- Receiving a poor final behavior mark
- Failing Math
- Failing English

Significant Numbers of 6th Graders Have These Risk Factors

- In a given year, between 1,000-2,000 6th graders in Philadelphia have each of these risk factors
- Students typically have one or two risk factors
- Only a few have three, virtually none have all four
- Altogether, about 3500 6th graders in 1996/97 had *one or more* of these risk factors

These 6th Graders Account for 40% of SDP Students Who Do Not Graduate

- 6th graders who **do not attend** regularly, receive **poor behavior** marks, *or* **fail math or English** have no more than
 - a 10% chance of graduating on time
 - a 20% chance of graduating one year late

They Also:

- Score poorly on the PSSA
- Become overage in the middle grades
- Become 9th grade repeaters (often for several years)

Attendance

Low attending sixth graders (students missing betw. 36 and 54 school days) have a 1 in 5 chance of making it to 12th grade on time

- Only 14% graduate on time or within one extra year

1996-97 6th g. students attending 70-80% of the time (n=1087)

	1996-97	1997-98	1998-99	1999-00	2000-01	2001-02	2002-03	2003-04

	on-track to graduation
	4-year grad

*right-hand columns may >100%, as 12th graders and grads overlap (grad status being 1 of 6 status codes that students carry)

Who Made It?

As hypothesized, sixth grade students with at least one risk factor graduated 1:4, while those students who did not exhibit any risk factors in the 6th grade graduated 4:3.

	Graduated	Did not Graduate
Had Risk Factor	1658	4114
Did Not Have Risk Factor	3500	2765

How Many Students With These Risk Factors Are Found in Our Middle Schools?

*Middle Schools with Sixth Graders with **One or More** Risk Factors, by Poverty Level and School Size, 1996-97*

	% Low-Income	6th Grade Enrollment	<80% Att	Att + Beh	Att + Math	Att + Engl	Bad Behavior	Beh + Math	Beh +Engl	Fail English	Fail Math	Fail Math/Engl	All Four
School 1	46	391	51	5	9	7	35	1	1	24	41	2	1
School 2	60	83	5	0	1	1	1	0	0	6	6	0	0
School 3	86.3	377	121	26	56	45	46	2	3	68	82	6	0
School 4	86.1	123	25	7	16	2	23	5	1	9	37	2	1
School 5	90.3	268	91	22	23	11	35	3	1	14	30	1	1
School 6	90	171	50	16	28	20	26	1	3	28	49	1	0

Successive Cohorts

- Numbers of 6th g. students in SDP in need of interventions remains high

6th Grade Predictor	1996-97 n=10,864*	1998-99 n=12,295	2000-01 n=11,252	2003-04 n=13,835
70-80% Attendance	1087	1024	1093	884
Poor Behavior	1400	1650	1680	<i>Forthcoming</i>
Fail Math	1424	1247	1076	1302
Fail English	905	953	943	965

**all n's include students with administrative, attendance and marks data*

Impact of Poverty on 6th Grade Risk Factors, SDP

Percent of 6th Graders with Risk Factors by Poverty Level 2003-04

Impact of K-8s on 6th Grade Risk Factors, SDP

Implications

- As early as the sixth grade, we can identify a significant percentage of students who will ultimately leave the District without graduating
- Before they drop out, these students will have multiple years of low test scores, poor behavior, and weak attendance
- This will impact not only the students themselves but the schools they attend

Implications (cont.)

- Intervening early and getting students “back on track” will not only decrease the dropout rate but will have positive impacts on middle grade and high school test scores, attendance, and overall school climate

Implications (cont.)

- Different groups of students will need different interventions
- As a result, the number of 6th graders needing additional supports can easily reach 50 to 100 students per school

How Can Middle Grades Be Re-designed and Re-envisioned...

- So that students make significant achievement gains?
- So that students stay on track to graduation?

Middle Grade Schools Need to...

- Acknowledge the impact of adolescence
- Acknowledge the impact of poverty
- Develop preventative and proactive strategies to mitigate their effects
- Have strong school-wide instructional programs, quality teachers, and strong professional development/teacher support

Combining Academic and Social Supports is Key

- **The Good News:** Research-based programs and approaches exist for both academic and social supports, for four levels of intervention
- **The Real Deal:** Will take reorganization of human effort, resources, and outlook to implement academic and social supports well and widely

Four Levels of Interventions Needed

- School-wide
- Targeted
- Intensive

Interventions Needed- Attendance

	Key Components	Programs in Place
Schoolwide	<p>Close Tracking of absences (daily/weekly)</p> <p>Meaningful Incentives</p> <p>Safety: in- and out-of-school</p> <p>Proactive Response to 1st unexcused absence</p> <p>Survey Reasons for non-attend</p>	<p>Check and Connect (Univ. of Minn.)</p> <p>British Stoplight Program</p> <p>School Attendance Initiative (SAI)</p>
Targeted	<p>Teacher Teams</p> <p>Problem Identification and solving</p> <p>Involve Families in Program</p> <p>Planning and Implementation</p>	<p>Check and Connect</p> <p>British Stoplight Program</p> <p>Proyecto Adelante (Oregon Council for Hispanic Achievement)</p>
Intensive	<p>Social Service Supports</p> <p>Effective coordination with-- and referral to-- social service agencies</p>	

Interventions Needed-- Behavior

	Key Components	Programs in Place
Schoolwide	<p>Teaching good behavior Modelling good behavior Recognition for good behavior Data Tracking Incentives</p>	<p>PBS (Positive Behavior Support) Univ. of Oregon</p>
Targeted	<p>Alternatives to Suspension- Constructive Reflection Grief Counseling Anger Management</p>	<p>PBS (Positive Behavior Support) Univ. of Oregon Time Out/Accommodation Rooms Second Step CADE</p>
Intensive	<p>Social Service Supports- effective coordination with and referral to social services</p>	<p>CSAP</p>

Interventions Needed— Course Failure

	Key Components	Programs in Place
Schoolwide	Strong Instructional Programs with balanced procedural and conceptual components	Core Curriculum
Targeted	"The Right Extra Help" (e.g., decoding v. comprehension) Coordination with classroom instruction	Elective Replacement (TDMS) Extra Help Labs Reduced Class Size (MGAP) Effective After-School Programs (Read 180, Understanding Math)
Intensive	Linked to classroom instruction Effective diagnosis (what % of socio-emotional skill gap)	Tutoring Very Small group instruction (<10 students)

Conclusion

- Middle grades reform in urban, high-poverty districts needs to be based on a proactive, preventative vision
- Transition to adolescence in neighborhoods of concentrated poverty can be a perilous time
 - A near majority of Philadelphia students are falling off the grad track at this point

Conclusion (cont.)

- Middle Grades schools need to assume that significant numbers of 6th graders will have attendance or behavior issues and/or need extra support in math and reading
- Without intervention, we can be fairly certain that these students will fall off track to graduation
- Middle grade schools need to be organized and resourced to meet the needs of these young people

Next Steps– Need Integrated Supports

- Putting all of these interventions in place in a *coordinated, integrated, and comprehensive* fashion in schools serving middle grades students; and
- Establishing *effective partnerships* between schools and social service providers
